SICILIA

Sicily is the largest island in the Mediterranean Sea.It has a classic Mediterranean climate with mild to warm, wet winters and warm to hot, dry summers. Sicily has more vineyards than any of the other Italian regions competing with Apulia for first place as the largest wine producer. Many grapes are made into raisins, used in local cooking, and Sicilian grapes also play a large role in creating dessert wines, which require a higher concentration of grapes and are consumed in smaller quantities. In fact, in the world of international wine, Sicily is renowned for the many outstanding dessert wines, such as the world-famous Marsala.;
