Antica Tostatura Triestina

ORGANIC COFFEE BEANS

Ref: C-CFFO157

Weight: 1000 g / bag

Package: Valve Bag

Case Unit: 6 x 1kg

Description: Our Organic line is double certified by the USDA NOP (USA) and also by BIO-CE (Europe).

The coffee beans in our organic line are grown without the use of pesticides or chemical-based fertilizers. They are grown slowly in the shade using natural soil organisms to sustain the valuable nutrients needed to preserve the integrity of the coffee beans, which also happen to be loaded with antioxidants too.

The origins used in our Organic blend comprise a variety of fantastic flavor profiles – cocoa, vanilla, nuts & fresh orange peel to name a few – creating an intense and amazing aroma in every cup.

Machine Compatibility: Whole bean coffee is used by those who prefer to grind their own beans to order. It's popular with both coffee shops and restaurant owners committed to freshness, and also by consumers at home who prefer to prepare their own drip coffee, French press pots, espresso, cappuccinos or lattes.

Organic whole bean is compatible with all traditional domestic or professional espresso machines (where a grinder is also available), as well as with all super-automatic espresso machines that have built-in bean hoppers and grinders. All super-automatic espresso machines that have built-in bean hoppers and grinders.

Any domestic or commercial percolator or auto-drip brewing system. Stove-top Moka pots and French Press pots.
