

Biondi Santi Franco - Tenuta Greppo

BRUNELLO DI MONTALCINO DOCG ANNATA 2006

Brunello di Montalcino DOCG Annata 2006

Exceptional harvest at Il Greppo. The spring was cold and wet. June, July and August hot and dry with considerable temperature range and rainfall at regular intervals. Rain in the first half of September followed by cool, dry air and a perfect harvest that began on September 18th. The must was rich in sugar, extract and acidity with a medium-low pH.

The "Annata" is produced from Greppo's Sangiovese vineyards between 10 and 25 years old. The "Annata" is aged 36 months in Slavonian oak casks. The basic characteristic of the Brunello of Greppo Biondi Santi is its longevity. The "Annata" type will age between 20 and 40 years. To allow the flavour to fully unfold, the bottle should be opened and a bit of wine poured out at least 8 hours before drinking.

TOSCANA

Wine has literally been a part of the Tuscan civilization for over 3,000 years. From the time the ancient Etruscans settled in the gentle rolling hills of Tuscany, viticulture and wine production have been an important element of everyday life and indeed was even considered to be mystical. Many people realize and it encompasses many different wine regions and climate types. The one thing most regions have in common is the selection of grape varietals. In general, Sangiovese is the dominant red varietal and Trebbiano is the dominant white varietal. The north west of Tuscany is mountainous and is famous for the beautiful Apuan Alps. The climate in the north is continental with hot summers and free frosts.
